Demeter 4.Zero

2 Story Manufacturing
Project Date: 2024-25

7145 Janes Avenue,
Woodridge, Illinois

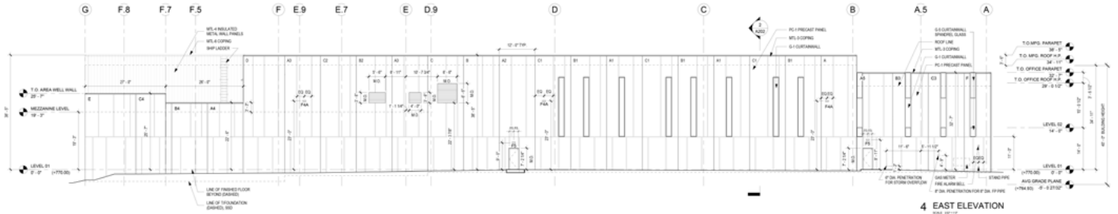

Tom Lee Studio

Project Summary:
Demeter 4.Zero is a two-story facility encompassing 54,371 GSF, designed to integrate functionality and modern industrial aesthetics. I contributed through all major design phases—Schematic Design, Design Development, and Construction Documentation—collaborating closely with the project team to refine spatial organization, technical detailing, and code compliance. The process emphasized efficiency in planning, clarity in documentation, and seamless coordination from concept through build-ready deliverables.

Wolcott

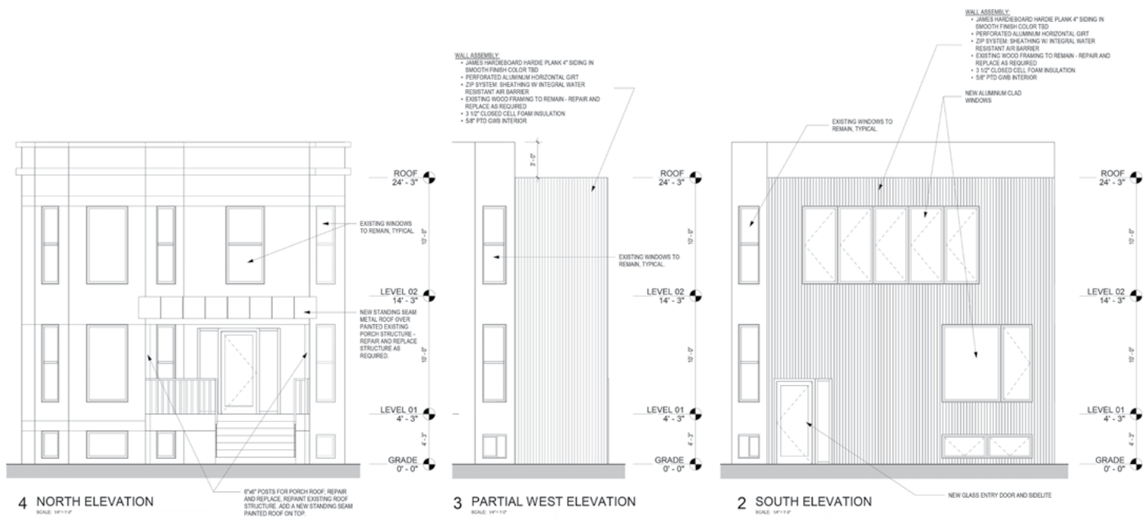

4212 N Wolcott Ave,
Chicago, Illinois

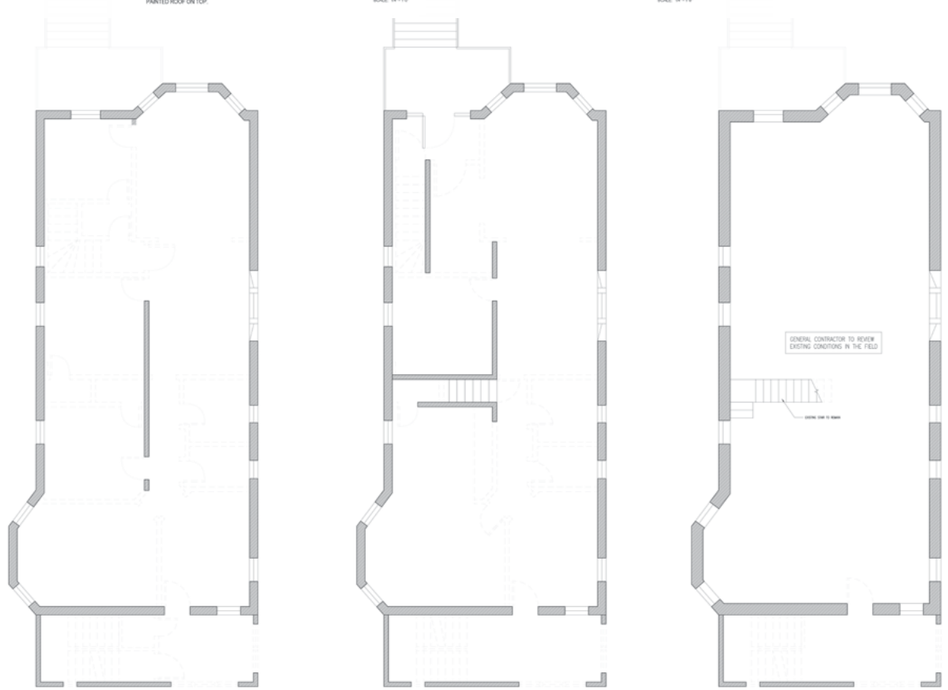

2 Story + 1 Basement
Project Date: 2024-25

Tom Lee Studio

Role: Project Architect
Project Phases: Schematic Design, Design Development

Project Summary:
Wolcott House is a three-level residential project totaling 4,227 SF, designed to balance contemporary living with contextual architectural character. I participated in the schematic design and design development phases, focusing on spatial layout, material selection, and façade articulation. My work emphasized design clarity, functional flow, and aesthetic cohesion within the project's compact footprint.

Burlington, ON

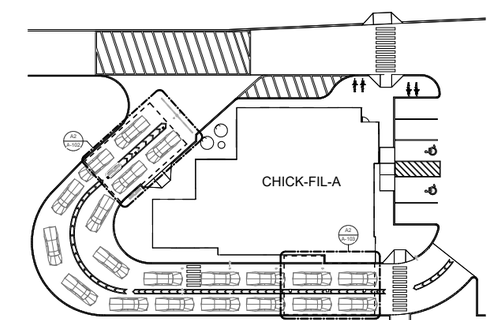

1 Story Retail
Project Date: 2021

Gensler

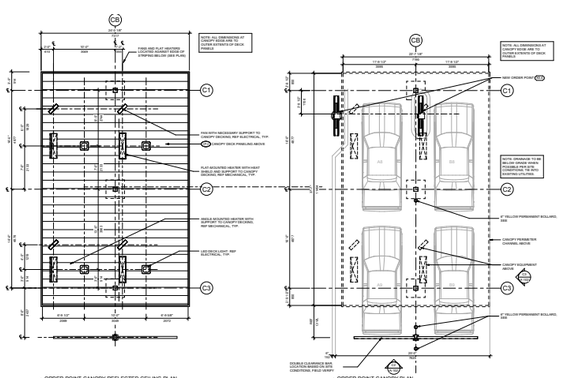

Occupancy: A2 (Group A, Division 2 – Free-Standing Restaurant)
Building Classification: 3.2.2.28

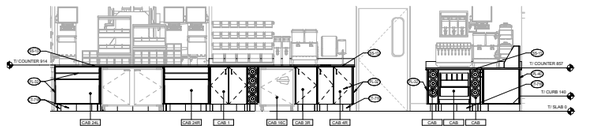

Role: Project Architect
Project Type: Template-Based Retail (P13 SE Large)

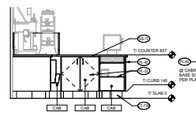

Project Summary:
Located in Burlington, Ontario, the 2331 Appleby Line project is a single-storey retail development based on the P13 SE Large prototype, tailored for a national restaurant brand. The design integrates a drive-through layout derived from the template, while maintaining flexibility in kitchen planning and seating arrangements to accommodate site-specific conditions.
I contributed to adapting the prototype to meet Ontario's strict public washroom and accessibility codes, ensuring compliance while preserving the brand's operational efficiency and design identity. The project reflects the balance between standardized brand architecture and localized regulatory and site constraints.

Project Date: 2021

Gensler

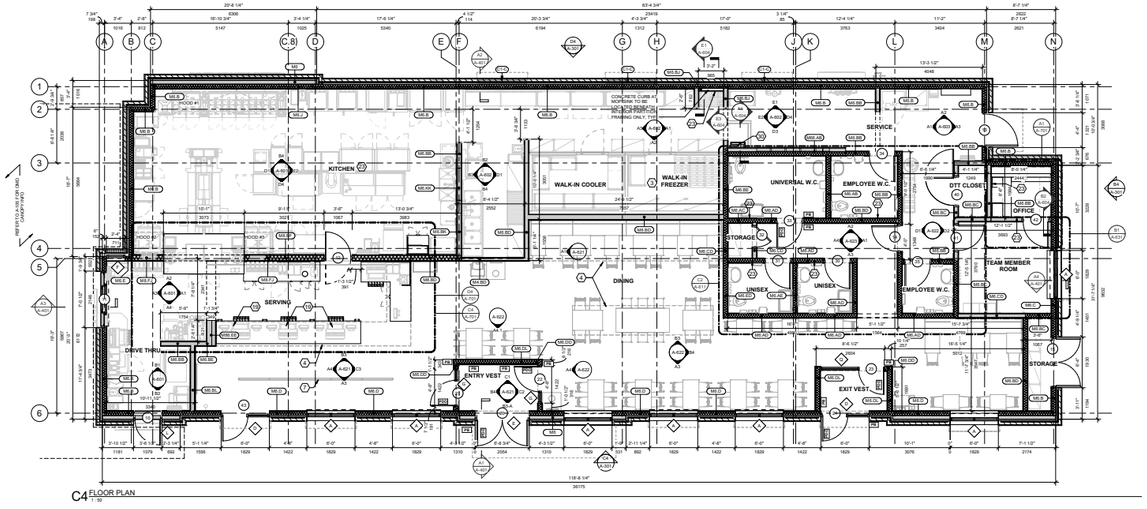

Occupancy: A2 (Group A, Division 2 – Free-Standing Restaurant)
Building Classification: 3.2.2.28

Role: Project Architect
Project Type: Template-Based Retail (P13 LE)
Project Phases: Schematic Design, Design Development, Construction Document

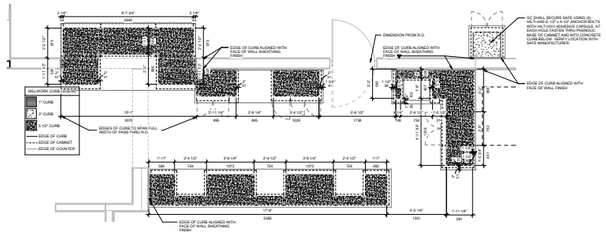

Project Summary:
The Chick-fil-A Cambridge project is a single-storey, free-standing restaurant designed under the P13 LE (Cambridge) template, featuring a refined layout optimized for high-volume customer service and drive-through efficiency. The building encompasses 451 square meters with a kitchen staff load of 15 and a public seating capacity of 96. I contributed to the schematic and design development phases, adapting the prototype to meet local zoning and Ontario Building Code requirements while maintaining brand design integrity. The project balanced functional efficiency, customer flow, and brand aesthetics to deliver a cohesive and compliant retail environment tailored to its site and community context.

Brininstool + Lynch

180 N Ada is a 14 story residential with 263 units with amenity spaces like fitness center, shared office, and a bar. As the project architect, I performed in planning development process like CDOT, CFD, and MOPD. Moving forward, I have developed the project in SD, DD, CD, and CA while coordinating with client, permit, civil, structural and MEP consultants. It has finished construction in late 2019.

Brininstool + Lynch

353 West Grand is a 41 story residential tower with 356 units with amenity spaces like fitness center, shared offices, and exterior deck. I have developed initial design for the tower with various schemes, and the concept of grid was selected to move forward with the design. Also, I worked with the client, client's lawyer and the City Hall, having to get through the initial city approval with city's consent.
